A Plain Talk on the subject of Digestion.

A healthy stomach is a blessing which is soldom rightly valued until it has been lost. How careless many people are. They tregard with unconcern the little allinents which are only the beginnings of serious trouble, and not until they are firmly in the grasp of some life-destroying disease do they realize what a healthy stomach is. The starting point for most diseases in the stomach, generally some little digestive derangement, yet as "great oaks from liftle acorns grow" so also do the diseases that kill begin in this ineignificant way. To maintain health it is necessary to properly digest the food you sat. You have perham at different times, possibly ery day, experienced after eating a size of oppression, sour stomach, hearth in headache, acidity, water rising, bad ath, fullness or bloated stomach. These is mymptoms of Dyspepsia, commonly as its indigestion, and if not corrected will lead to a breakdown of constitutional strength, a condition which invites discusses that physicians seem unable to cope with.
